

Long Lake TMDL Meeting
May 19th, 2009
Health and Human Services Building
2200 23rd St. NE,
Lower Level, Multi-Purpose Room
Willmar, MN
5-7 PM

You are invited to attend the Long Lake Excessive Nutrients Total Maximum Daily Load (TMDL) meeting.

The Hawk Creek Watershed Project (HCWP) is holding its second public meeting addressing an Excessive Nutrient TMDL for Long Lake, northwest of Willmar.

This is the beginning of a multi-year process of developing a Long Lake Nutrient TMDL pollution reduction plan, engaging stakeholders and citizens, and implementing activities for achieving desired pollutant reductions. A TMDL is a scientific study that calculates the maximum amount of a pollutant that a water body can receive and still meet water quality standards for that pollutant. It is also a process that identifies all the sources of the pollutant causing the impairment and allocates necessary reductions among them. A draft TMDL is scheduled to be completed by 2011.

Public participation is essential to a successful TMDL!

Agenda for May 19th Meeting

-  Status of Long and Ringo Lake Fisheries-Bruce Gilbertson, MN DNR
-  Citizen Lake and Stream Monitoring-Hawk Creek Staff
-  Update on Lake Assessments-Hawk Creek Staff
-  Development on the Lake
-  Feedlot Inventory
-  Future Surveys/Assessments needed
-  Update on the regrouping of the Long Lake Association
-  Other Information and Discussion

Please contact HCWP staff if you have any questions, or if you would like to participate on the advisory committee but cannot attend this public meeting.

Discussion from the last meeting on April 16th can be found at: http://hawkcreekwatershed.org/index_files/Page810.htm under the Upcoming Meetings section.
